

ANNUAL
SCIENTIFIC
MEETING

Persistent Post Surgical Pain: Challenges & Approaches

Tuesday 2nd May 2017

The Birmingham Conference & Events Centre (BCEC), Hill Street, Birmingham, B5 4EW

Organised by The British Pain Society Acute Pain Special Interest Group

About this event

With around 10 million surgical procedures carried out in the NHS per year, and 2-10% of patients continuing to experience severe pain beyond the immediate post-operative period, persistent post-surgical pain is something that we all need to understand.

Join Prof Stephan Schug, Chair of Anaesthesiology, University of Western Australia, at this unique study day that brings together experts across specialties and professions to discuss the challenges of persistent post surgical pain (PPSP) and to share their experiences.

This event will be held immediately prior to the BPS Annual Scientific Meeting (3rd-5th May 2017) and significant discounts are available to BPS members attending both events.

Learning objectives

- To become more familiar with the epidemiology and neuromechanisms of PPSP
- To be updated about intraoperative interventions to minimise PPSP
- To achieve a greater awareness of the psychological and genetic factors that influence PPSP
- To gain an awareness of the impact of PPSP in different clinical settings including general practice and the community

The Programme (0945-1640)

Welcome & overview	Prof Stephan Schug
Epidemiology of PPSP	Dr Julie Bruce
Neuromechanisms of PPSP; from the periphery to the brain	Dr Mick Serpell
A trio of clinical PPSP experiences; ketamine & thoracic surgery, cardiac implants & PPSP and PPSP after caesarean section	Dr Gillian Chumbley Ms Felicia Cox Dr Katie Warnaby
Intraoperative interventions to minimise PPSP	Dr Sibs Anwar
Is there a genetic predisposition to PPSP?	Dr Sabu James
PPSP and joint replacements	Mr Sanchit Mehendale
PPSP in the paediatric population	Dr Kevin McCarthy
Psychological factors & PPSP	Dr Whitney Scott
Impact of PPSP on general practice	Speaker TBC

Registration fees

Numbers are limited thus on-site registration will **not** be possible. A 50% reduction on the lowest registration fee is offered if four colleagues from the same institution register.

BPS members

BPS member attending ASM	£65
BPS member not attending ASM	£130

Non BPS members

Non-member attending ASM	£130
Non-member not attending ASM	£200

Register today to avoid disappointment
